

Being a web developer I enjoy building rich interactive web apps using latest technologies. I strive to make web a beautiful place with every line of code so I want to work in an organization with dynamic and professional team, where I can use my capability to achieve the organizational goal and to grow personally as well as professionally.

Experience

I am having more than 12 years of relevant experience in web development.

2021-Sep to Present
Associate Manager
Ernst & Young

- Collaborating with a team of UI developers to craft products tailored to diverse audit tasks across different companies, utilizing cutting-edge front-end technologies.
- Additionally, seamlessly integrating GEN AI into select projects to infuse intelligence and enhance the sophistication of our offerings.
- Guiding a compact team of developers in direct collaboration with the client teams, adeptly collecting client requirements and designs. Subsequently, conducting thorough analysis, including proof of concepts (POCs), to develop solutions aligned with client needs.
- In addition to development tasks, I also conducted code reviews for the team and generated reports using Sonar Lint.

2017-June to 2021-Sep
Lead UI Developer
Conduent, Inc.

- Collaborating with the core implementation team to craft advanced versions of existing products, incorporating cutting-edge technologies to boost performance and efficiency.
- Developing the frontend with AngularJS and React frameworks, seamlessly integrating with REST APIs for efficient data retrieval and posting across web applications.

2016 - Nov to 2017 - Jun
Senior Engineer - Software Development
Landis + Gyr LTD.

- As a solo contributor within my team, I focused on UI-related tasks for smart meter application solutions.
- Designed and implemented two mini portals, incorporating third-party integration into the smart meter application web portal architecture.
- I collaborated directly with client teams to comprehend their requirements and successfully delivered high-quality code ahead of schedule.

2014 - Aug to 2016 - Nov
UI Developer
hCentive, Inc.

- As a member of the UI team, I contributed to the development of US healthcare portals, aiming to deliver exceptional customer experiences.
- We focused extensively on web accessibility tools and technologies for US government portals, ensuring compliance with 508 standards.
- Developed advanced user interactive web applications to showcase during demonstrations aimed at attracting new customers in the market.

2011 - Oct to 2014 - Aug
Software Developer
Cognizant Technology Solutions and ACS A Xerox Company

- Initiated my professional journey as a member of the UI development team, dedicated to delivering web solutions within the US Healthcare/Savings and Retirement sectors.

Education

2008 - Aug to 2011 - Jul
Master of Computer Applications, Chitkara University

- Graduated with 7.13 CGPA.
- Was a part college sports and technical event groups.
- Worked on college project to manage student records like class attendance, practical, theoretical scores and other personal information.

2005 - Jul to 2008 - Jun
Bachelor of Science, Panjab University

- Graduated with 67% marks.
- Participated in cultural and sports events. Played table tennis at State level.
